Focus Book of the Month

Every Season

By
Anne Love Woodhull and Shelley
Rotner

Beautiful color photographs illustrate this picture-book celebration of the seasons. "I love spring," the text begins, and in simple, poetic phrases, a speaker describes the unique pleasures of the season. In spring "Speckled eggs fill woven nests. / Showers soak. Seeds sprout. Flowers bloom." The accompanying photos show close-ups of eggs and flowers, rows of newly spouted plants, and a smiling child beneath an umbrella. In the following spreads, the speaker moves through summer, fall, and winter and points out each seasons' special wonders, all illustrated with eye-catching images. The concept is certainly familiar, if not shopworn. What distinguishes this is the quality and selection of the photos and the lovely spare words, which repeat sounds and lines with an easy, circular rhythm that echoes the cycle of seasons and encourages child participation.

Infant School

April

April was a month filled with many happy moments; our students were really excited with the theme "Means of Transportation". We learned their different uses and classified them according to their travel place and physical characteristics. We enjoyed every activity we did. Our vocabulary increased notoriously, through new poems and songs related to our focus book.

Working with numbers has become part of our routine. We are counting with great enthusiasm every day, and interest in quantities and amounts is evident among the group.

The month concluded with our Easter celebrations. We had so much fun during the Easter Parade, "showing off" our beautiful hats.

May

We have very high expectations for May. Our theme "Fun Summer" will become the center axis for the month. We will learn how to identify the clothing that we use on the beach, classify beach toys, identify the activities that we do in summer, and recognize the names of the activities and beach toys.

We will also be learning about textures and surfaces through multiple sensorial activities. We are going to manipulate clay: rolling it into small balls, long rolls etc. Dressing up activities will be part of our learning experiences; the use of fasteners such as buttons, zippers and laces.

In math we will continue working with number concepts like: spatial relationships and quantities. Patterns will be formally introduced to our mathematical practices.

Our month will be filled with great opportunities and fun filled activities.

Fun Summer Activities

The school year is coming to an end, and that means that it's time to start thinking about what to do with the kids for the summer. Kids need a bit of variety, and they need activities that can stimulate mind and body. Here are 10 fun summer activities

1. Go swimming.
2. Parks and Recreation neighborhood activities.
3. Amusement parks and fun centers.
4. Sports programs.
5. Zoos, aquariums and museums.
6. Summer camp.
7. Day Camp
8. Go to the beach
9. Go to museums
10. Go Camping
