Dear parents of 9th and 10th grade:

It is that time of the year where we get to open the doors of creativity, knowledge, wisdom, and personal growth. It is time to bring your backpack full of hope and dreams, and get excited on the new adventures we get to live.

Welcome Back to School!

Math time is going to be enriching and joyful. We are going to work together to make learning a fun, rewarding experience.

My name is Roberto A. Campusano, the school's math teacher for Algebra II and Geometry. I have been a part of the Math Department of Saint George School for 4 years. I hold a Bachelor's Degree in Mathematics from Rhode Island College (US) and an Associate's Degree in Science and Technology from Community College of Rhode Island (US). I am also a Design Artist and a language specialist. At Saint George, my other responsibilities include being a homeroom teacher and helping our students enrich their vocabulary so that they can improve their command of the English language.

Math may be defined as a language that dissolves ambiguity and gives certainty. It is my goal to empower the minds of students with knowledge and passion for mathematical principles and enable them to utilize this power to succeed both academically and personally. This is why students will be not only exposed to computational techniques and mechanical operations, but also to the philosophical foundation of the subject matter.

Let's open the doors of learning and allow new experiences to shape memorable moments.

Let's work together to make this a truly extraordinary school year.

Sincerely,

Roberto A. Campusano
